

MAXITEK MIX high performance professional woodscrews

Very sharp point offers fast pick up in soft wood, hard wood, chipboard and board materials.

Lubricated with a non-toxic coating which reduces the energy required to insert the screw. This is particularly important when used with battery powered tools as it allows more screws to be driven in per charge.

Deep countersunk pozi head, allows for deeper insertion of the screwdriver bit reducing cam-out and helps reduce snapping.

Reinforced double collar reduces the likelihood of head shear and assists completion of countersinking.

Deep sharp single thread gives maximum pull out in all woods and modern board materials.

CONVERSION CHART	
METRIC	IMPERIAL
3.0mm	= 4 gauge
3.5mm	= 6 gauge
4.0mm	= 8 gauge
5.0mm	= 10 gauge
6.0mm	= 12 gauge
